

Data Feed Release Notes

Release Date: January 31, 2023

Support for TLS version 1.2

Summary

CREA is upgrading its Transport Layer Security (TLS) standards for DDF® connections. As of January 31, 2023, the minimum TLS version supported for incoming connections will be TLS v1.2.

Connections to DDF® will be lost if the TLS standard is not updated. From January 31, 2023, connections that cannot negotiate a TLS 1.2 handshake will lose access to DDF®.

This will result in enforcing Https for all incoming requests to support TLS v1.2

Impacted services

- Data.crea
- DDF.realtor
- DDFAPI.realtor
